The functionality will cover any needs

Automatic filling of the work table and salary calculation only for the worked time

— You will see who worked and on what days, as well as when and how much he took the day off.

— You can set a minimum number of hours worked to credit the working day.

— Yaware automatically calculates the salary, taking into account vacation, weekends and missed days.

The screenshot displays a web application interface for managing employee work hours and salary calculations. At the top, there are three buttons: 'Reload', 'Export to CSV', and 'Calculate / Hide Salary' (which is circled in red). Below the buttons is a table with columns for Employee, days of the week (1-7), and a final column for the total. The table is organized into sections for Accounting, Management, and Marketing. Each section lists employees and their work hours for each day, with some cells highlighted in green (worked) and others in red (day off). The final column shows the total hours worked for each employee.

Employee	1	2	3	4	5	6	7	
Accounting								
Charles Thompson	7.3	6.5	0.1	0	6.1	6.3	7.3	
Christopher Smith	7.4	7.6	0	0	7	7.3	7.5	
John Martinez	7.4	7.3	0	0	5.1	7.7	7.6	
Robert Garcia	0.1	0.3	0	0	0	0.5	2.9	
Management								
John Johnson	9.1	7.8	8.3	0	7.9	10.2	10	
Michael Thomas	8.3	4.1	0	0	0	5.1	8.1	
Marketing								
Barbara Hernandez	7.5	4.5	0	0	0	8.5	6.3	

The functionality will cover any needs

Performance analysis: you will understand what the employee does and how productively he uses working hours

— Service recognizes productive, neutral and unproductive resources.

— You can create individual settings for each employee.

For example, for a designer, Photoshop is a productive program, and for an accountant, it is unproductive.

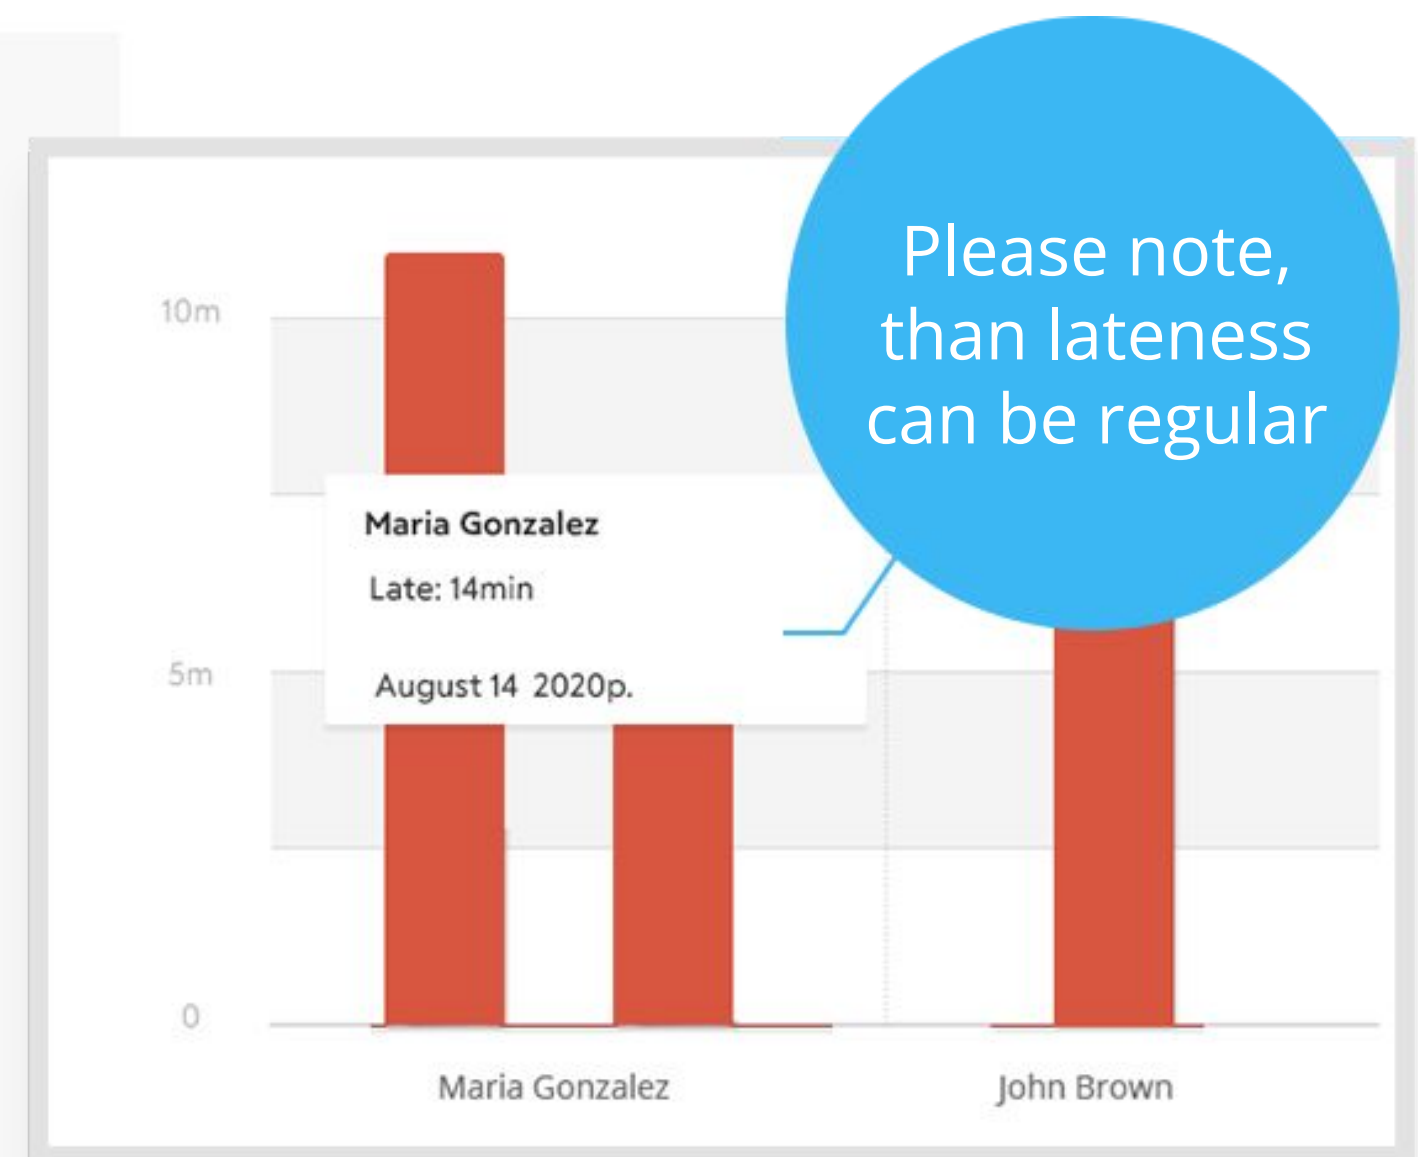

As a result, the employee will see what steals his time and will be less distracted.

The functionality will cover any needs

Tracking for delays

- You will find out who violates the daily routine and how often it happens.
- Report on delays: who, when and how often is late.
- Report on employees who prematurely end the working day.

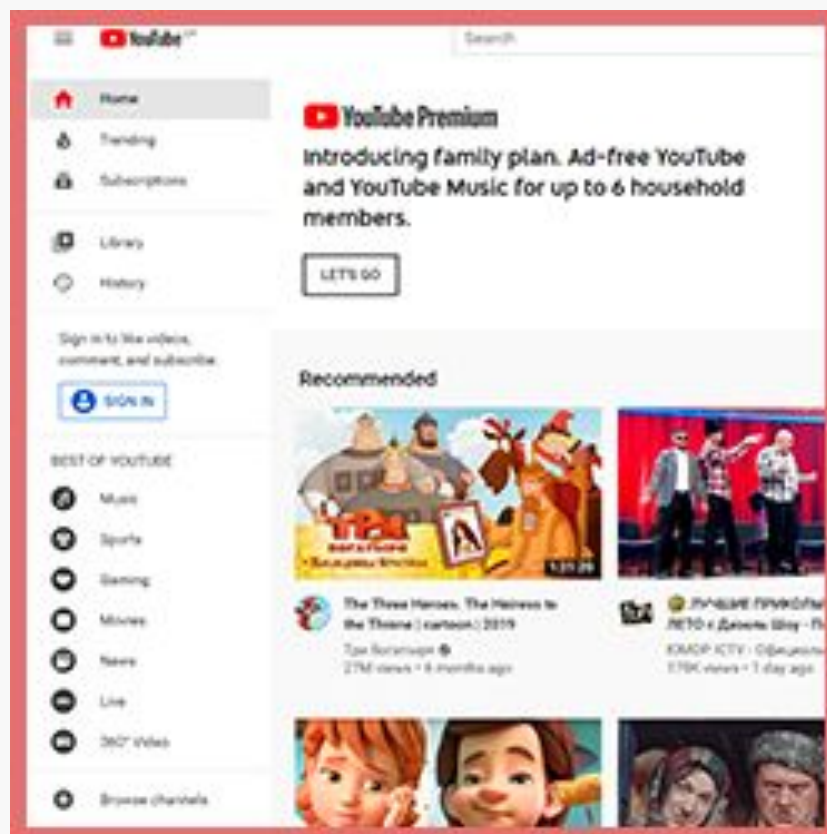

The functionality will cover any needs

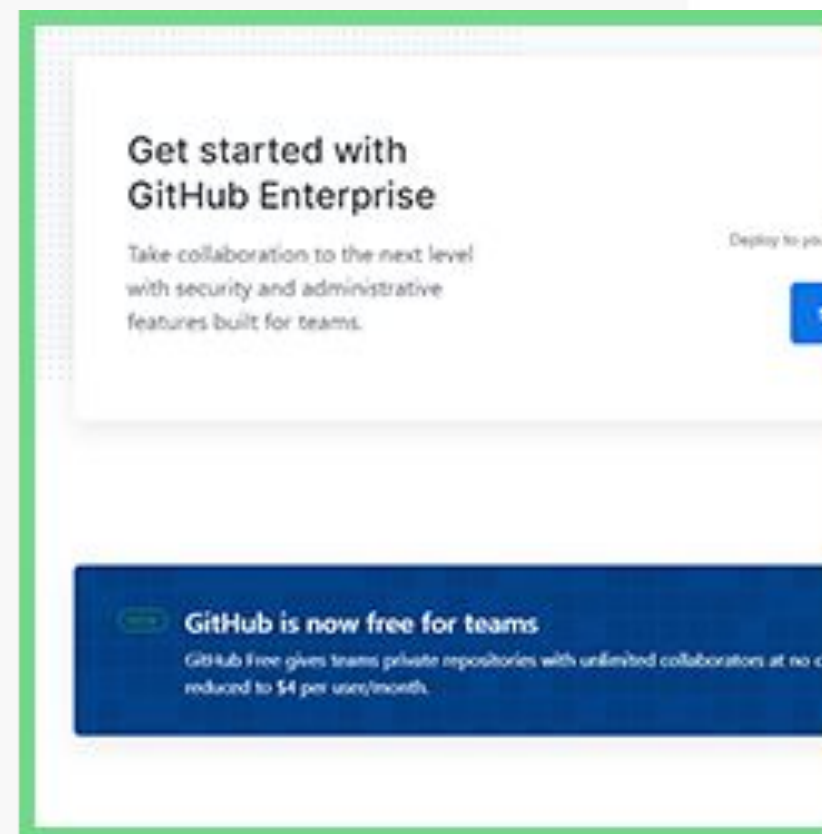

Screenshots and webcam pictures. You will find out if employees use the resources of the company for personal purposes.

— You will see which project an extrabudgetary stuff member or freelancer is working on.

— You will only be able to pay for the time the freelancer has spent working on your project.

The functionality will cover any needs

Remote control

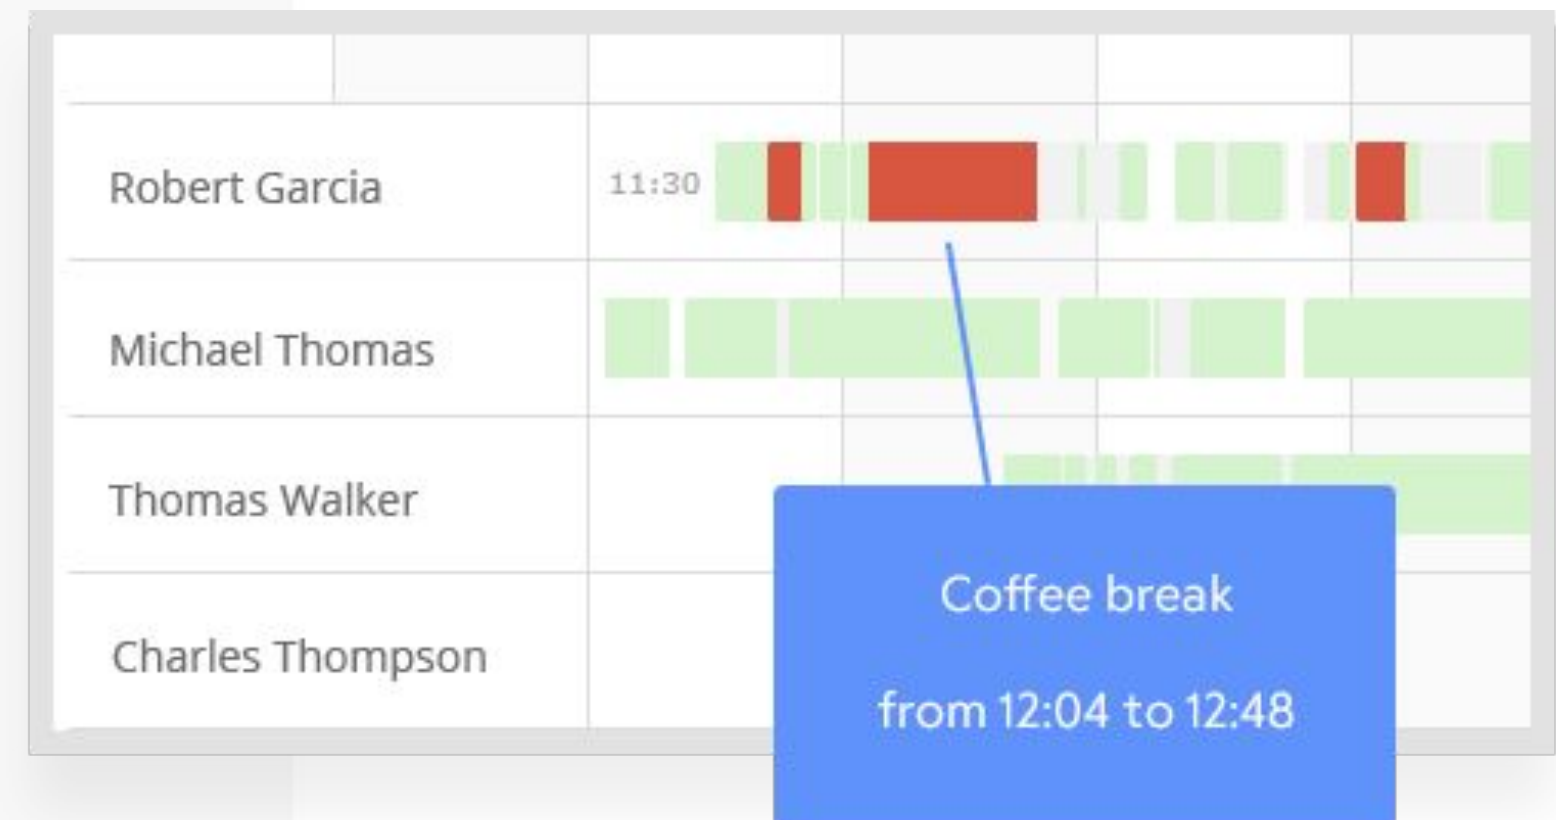

- Online monitoring of employees: you will see what employees are doing at the moment.
- Employees' work reports by email.
- Review and analyze of statistics on iOS / Android phones and tablets.

The functionality will cover any needs

Time tracking is not on the computer: you will learn for what purpose employees use their time when they are offline.

- How long the employee was absent in workplace.
- How much time the employee spent on productive tasks, such as meetings with customers, and how much - on personal matters.

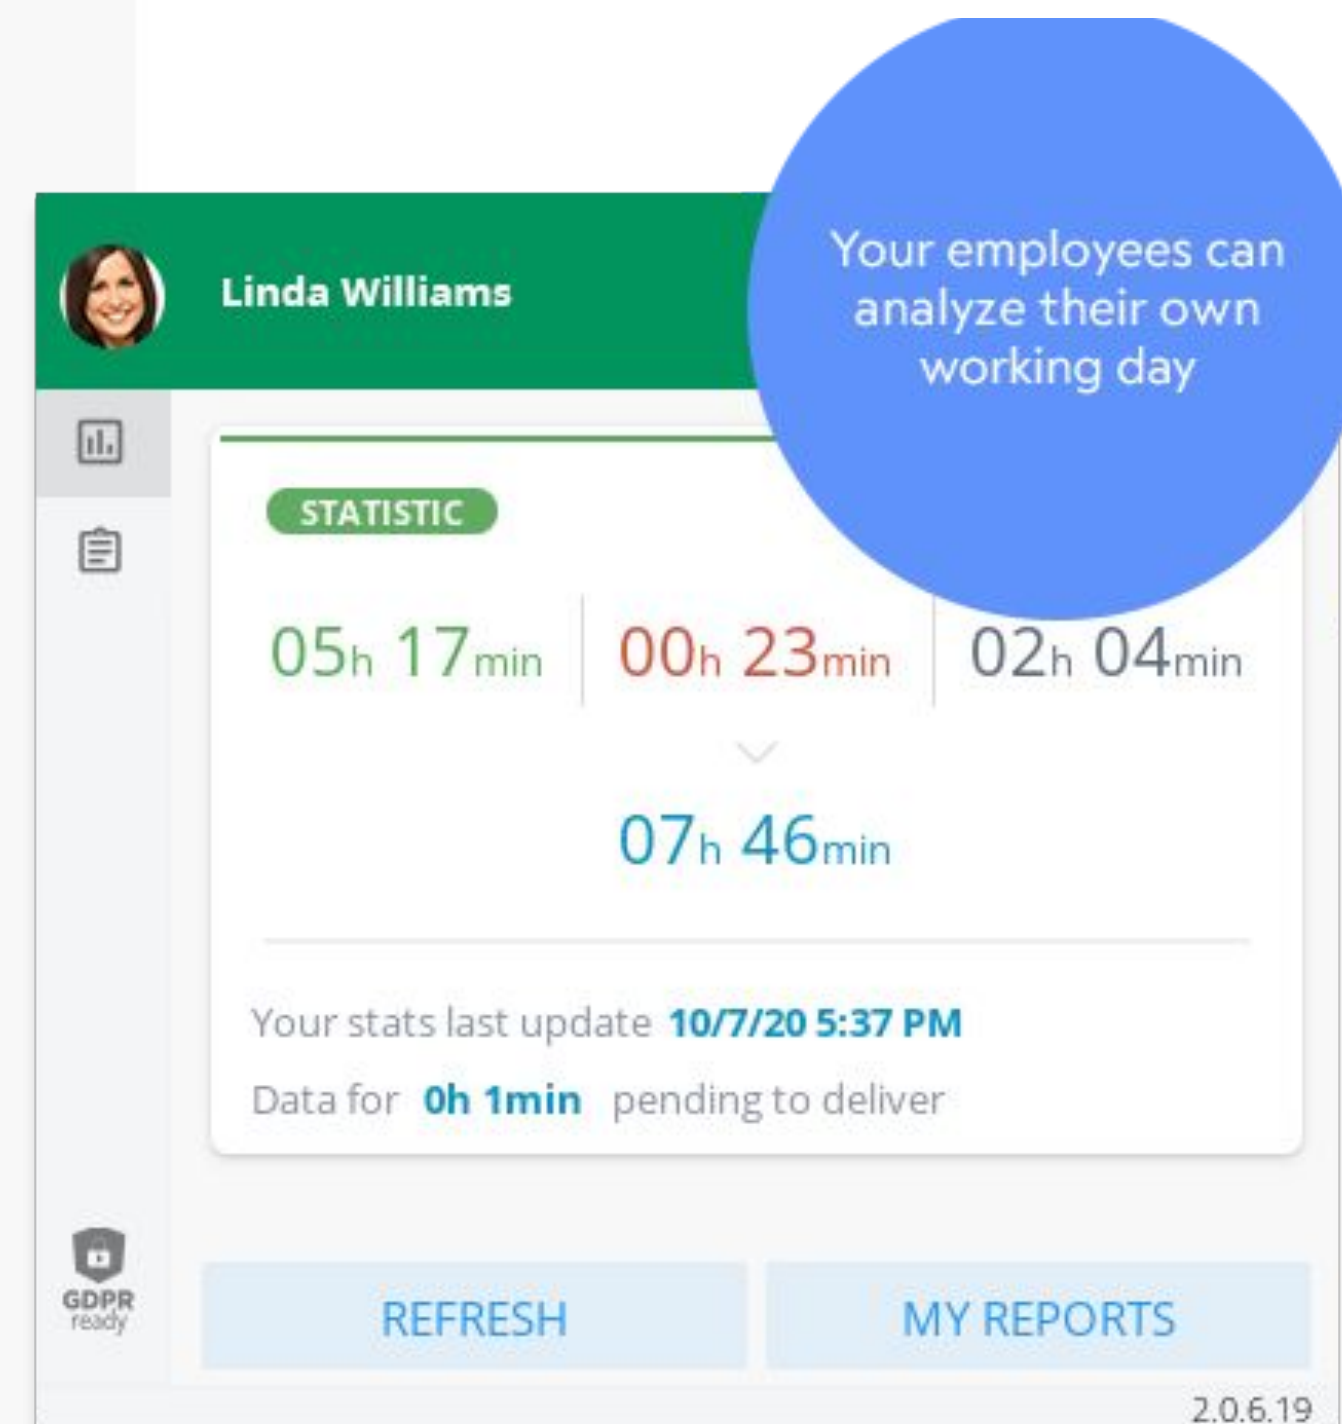

The functionality will cover any needs

Evaluation of personal statistics: employees themselves will understand how to become more productive

— The employee has access to personal statistics. He sees how much he spent on the task and can compare himself with colleagues.

— He will understand what programs distract him from work and when, during the day, he works most productively.

Features of Yaware

Individual settings for the employee and department

- You can set a free or fixed work schedule;
- Make a list of productive, neutral or unproductive resources for each employee;
- Indicate the types of productive offline activity for the employee. For example, a presentation for a designer and a meeting for a salesperson.

Grouping of employees by departments

For companies that have remote offices and branches in other cities, Yaware will help bring employees together by department and transfer management powers to local heads.

Integration with Jira, Trello, Bitrix24 ..

Soon you will be able to control the work of employees in popular systems - JIRA, Trello, Asana, RedMine, Bitrix24 and others.

Features of Yaware

Customizable in 20 minutes from one computer

Send an invitation link to employees by email so that they can install the program themselves. Yaware is customizable at once on all computers from the personal account.

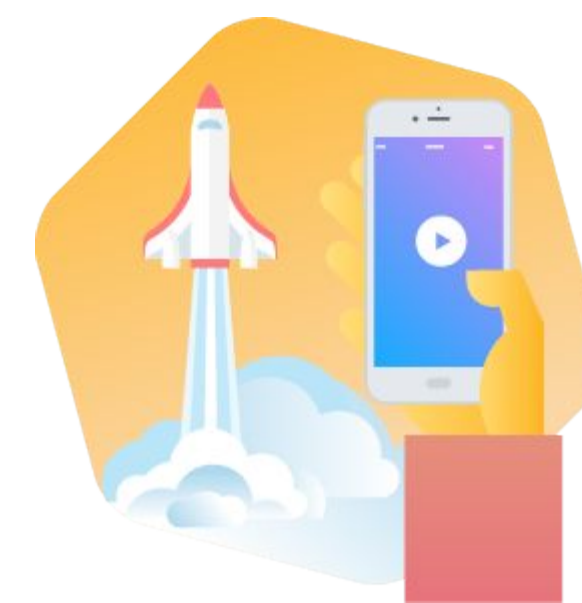

Adapts to your ecosystem

- Works on Linux, Windows, MacOS and server terminals.
- Automatic updates, free support.

Suitable for large companies

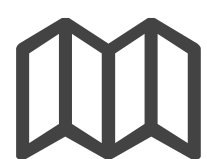

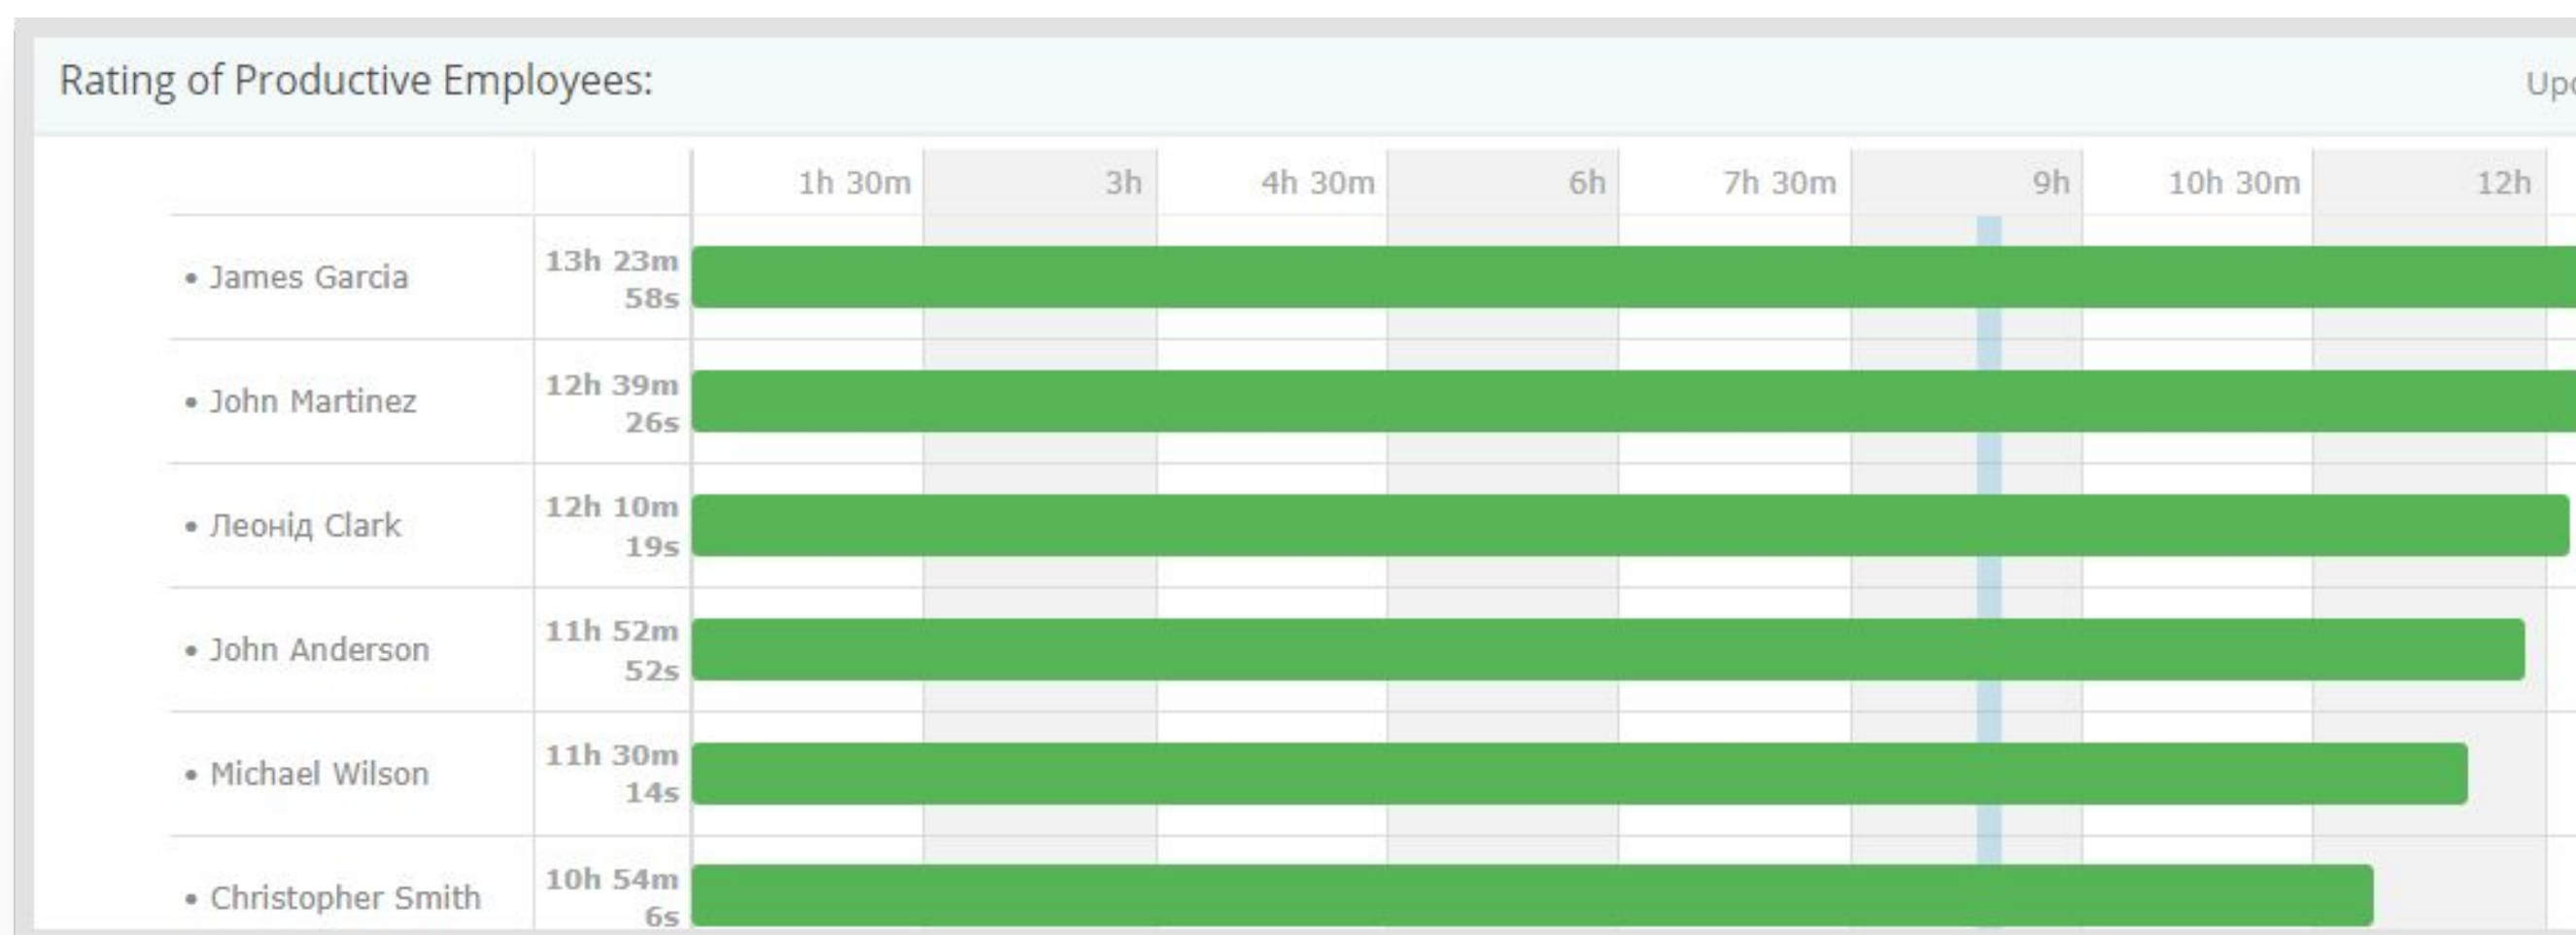

- Full data protection - information is stored on your local server.
- Does not require an internet connection.
- Free technical support for the first year after purchase.
- Free staff training.

Features of Yaware

Employee rating: you will see who works less than the others

Does not contradict the Labor Code

Time tracking for employees' working hours is permitted by the Labor Code of Ukraine and other countries.

Your data is protected

Yaware runs on dedicated servers that are only accessible to authorized employees.

Implementation will go without problems

No training required

The service is intuitive and works in a semi-automatic mode. You do not need to conduct corporate training, for example, as in the implementation of CRM.

A positive atmosphere will be preserved

Most of our customers do not have problems with the implementation of Yaware. Employees understand that this is beneficial for both: them and you.

Employees will understand the value

We will show your employees the value of working with the service with the help of training materials.

«During the implementation, I conducted interviews with all employees and there were no objections to the installation of the system. There was no negative after that»

KALUGA REGIONAL PUBLIC
ORGANIZATION «Consumer protection»

Free and fast technical support

Sales department will select a solution within an hour

Development department will add features that you lack

Technical support will respond within 60 seconds

We guarantee

In 14 days you will see the result, even if you had everything perfect in the company.

Sales department

- Will start answering calls faster
- Will stop forgetting to enter customer data into CRM
- Will start selling more and spend less time on social networks and smoking breaks

Freelancers

- Projects will be handed over faster
- You will understand how much freelancer's hour really costs
- You will start paying only for the hours worked

Development department

- You will understand how the workload is distributed in the department
- What tasks cause difficulties for employees
- How much an hour, task and project cost

The service will pay off itself in the period from one month to one year

The calculation is based on real statistics of our customers.

Before implementation

Tasks monthly	Productivity	Time execution	Rate	Cost of tasks
100	50%	200 hours	\$20 / hour	\$4 000

After implementation

Tasks monthly	Productivity	Time execution	Rate	Cost of tasks
100	80%	200 hours	\$20 / hour	\$2 800

You save
\$1 200 per month

With Yaware 2,856 companies around the world began to earn more.
